

## RE23 SERIES TYPE 13/GDP-4.2/C

## THRUSTER MOTOR

Propulsion Thruster Motor for unmanned underwater robot. Up to six units used per machine. Brushed high torque Rare Earth magnet planetary gear motor with custom output shaft. Half the size and weight of previously used motor with greater thrust.

- 120 Volt DC
- 2 Amps
- 12 in-lbs Cont. Torque
- 70 in-lbs Peak Torque
- 4.2:1 Ratio
- 1500 RPM
- 2400 RPM max.
- .3 Horsepower cont.
- 1.2 Horsepower Peak
- 2.5 lbs Unit Weight
